Datamites Institute, Bangalore 2025 – Present

Data Analyst Certification Program (6 Months)

- Coursework: Excel, SQL, Power BI, Python, Statistics, Machine Learning (Project Phase in Progress)

Visvesvaraya Technological University 2020 – 2024

Bachelor of Engineering in Information Science and Engineering

- Cumulative GPA: 7.4 / 10

Experience

Senior Technical Process Executive, Infosys BPM Limited Mysore, India Feb 2026 – Present

- Provide B2B IT infrastructure support and complex technical troubleshooting for Bendigo and Adelaide Bank enterprise users.
- Manage user accounts, permissions, and access configurations daily within Active Directory (AD) systems.
- Optimize endpoint administration and software deployments across the client network utilizing HCL BigFix.
- Leverage ServiceNow for end-to-end incident handling, maintaining strict SLA metrics and internal quality standards.
- Analyze ticket queues using Microsoft Excel and Power BI, integrating in-built Copilot AI to isolate recurring system defects and boost process efficiency.

Technical Support Specialist – Lenovo Process, Joules To Watts / Concentrix Jan 2025 – Jan 2026
Bangalore, India

- Managed and resolved over 40 technical CRM tickets daily across digital and voice channels within strict turnaround parameters.
- Handled complex customer and dealer infrastructure escalations professionally, safeguarding brand loyalty and client satisfaction metrics.
- Coordinated directly with cross-functional software and engineering groups to systematically reduce repeat product issues.
- Maintained granular case documentation to support historical diagnostic metrics, training resources, and auditing procedures.

Projects

E-Commerce Product Experience Optimization via Opinion Mining

- Developed an end-to-end Machine Learning pipeline to scrape, clean, and analyze consumer sentiment and behavioral patterns from unstructured product reviews.
- Generated actionable data-driven insights using Python and statistical modeling to optimize recommendation engines and enhance customer UX metrics.
- Recognized as an award-winning state-level project showcasing advanced consumer behavior analytics and natural language processing applications.

Data-Driven Farm Management Infrastructure System

- Designed and architected a robust, data-driven management system using SQL database structures for secure record-keeping, resource input logistics, and operational tracking.
- Engineered intuitive reporting visualizations and streamlined user flows, drastically minimizing tracking errors while accelerating data entry usability.

Technologies & Tools

IT Operations & Enterprise Support: ServiceNow, Microsoft Dynamics CRM, CRM Platforms, HCL BigFix, Active Directory (AD)

Data Analytics & Visualization: Advanced Microsoft Excel, Google Sheets, Power BI, SQL (Core Syntax), Python
