PROFESSIONAL SUMMARY

Results-driven BCA final-year student (2026) with hands-on experience in Python, SQL, Machine Learning, Tableau, Power BI, and AWS. Delivered end-to-end data science projects spanning healthcare analytics, hospital operations intelligence, and mutual fund prediction. AWS Certified Cloud Practitioner seeking a Data Science / AI-ML role to drive data-driven decision-making.

WORK EXPERIENCE

Machine Learning Intern

Prinston Smart Engineers, Bangalore | Jan 2026 – Feb 2026

- Designed, trained, and optimised supervised ML models in Python on real-world datasets, improving prediction accuracy through iterative hyperparameter tuning.
- Performed end-to-end data preprocessing and exploratory data analysis (EDA) to enhance data quality and feature relevance.
- Evaluated model performance using precision, recall, F1-score, and ROC-AUC metrics.
- Collaborated with cross-functional teams; produced technical documentation and actionable insight reports.

PROJECTS

Mutual Funds India Prediction | Academic Project | 2025–2026

Python · Random Forest · Linear Regression · Feature Engineering

- Developed ML models (Random Forest, Linear Regression) in Python to forecast mutual fund NAV using 5-year historical financial data.
- Engineered features via data preprocessing and selection; validated accuracy through cross-validation and performance metrics.

Hospital Operations & Revenue Intelligence System | 2025

Power BI · DAX · KPI Dashboards

- Built interactive Power BI dashboards visualising hospital revenue, occupancy rates, and operational KPIs for management decision-making.
- Designed DAX measures and drill-through reports to surface actionable insights across departments.

Healthcare Metrics Dashboard | Mini Project | 2025

MS Excel · Pivot Tables · Data Visualisation

- Created an interactive Excel dashboard with pivot tables and dynamic charts to monitor patient throughput, billing, and key healthcare metrics.

EDUCATION

Bachelor of Computer Application (BCA) | 2023 – 2026 (Pursuing)

St. Francis College, Bangalore City University

- Relevant Coursework: Python, Data Analytics, Machine Learning, Data Structures, Web Development

12th Grade | March 2023

Al-Ameen PU College, Bangalore

TECHNICAL SKILLS

Programming Languages: Python, Java

Data & Analytics: SQL, MS Excel (Pivot Tables, Dashboards), Tableau, Power BI

Machine Learning / AI: Supervised Learning, Feature Engineering, Model Evaluation, Data Analysis

Cloud & DevOps: AWS (Certified), Git, GitHub

Tools & IDEs: Jupyter Notebook, VS Code, MS PowerPoint

CERTIFICATIONS

AWS Certified Cloud Practitioner | Cloud Institution

Tableau for Data Visualization | Campus Tech

Data Analytics Using Python | ISO-Certified, VTU-Partnered Institution
